Proper maintenance and economy of operation of modern boilers and cooling towers require a careful balance between water quality parameters and treatment chemicals. An economical test kit for monitoring scale formation in small industrial boilers, the BSC-1 Boiler Feed and Scale Test Kit uses drop count titration methods to determine levels of alkalinity, chloride, and hardness.

Specifikacije

Model:	BSC-1
Platforma:	Titratör brojač kapi-Drop Count Titrator
Primjena:	Boiler Water
